Summary information

Repository:	University of Miami Special Collections
Title:	Julian D. Corrington papers
ID:	ASM0048
Date:	1917-1963 (date of creation)
Date:	1917-1963 (date of creation)
Physical description:	Boxes
Language:	English
Dates of creation, revision and deletion:	

Administrative history / Biographical sketch

Note

Julian D. Corrington was a professor of zoology at the University of Miami and served as Chairman of the Zoology Department. He taught zoology and botany from 1926 to 67, and also held the university's first courses in marine zoology and marine botany during the 1930's. Corrington wrote numerous articles and books on biology and the microscope. His column, "Under the Microscope" appeared in Nature Magazine. Leisure and Modern Mechanix magazines also published a number of Corrington's articles on microscopy. Corrigan created "songs for Biology," parodies of popular songs with biology-related lyrics, and "Biology Is Fun," a selection of essays, stories, plays and other works.

Julian D. Corrington was a professor of zoology at the University of Miami and served as Chairman of the Zoology Department. He taught zoology and botany from 1926 to 67, and also held the university's first courses in marine zoology and marine botany during the 1930's. Corrington wrote numerous articles and books on biology and the microscope. His column, "Under the Microscope" appeared in Nature Magazine. Leisure and Modern Mechanix magazines also published a number of Corrington's articles on microscopy. Corrington created "songs for Biology," parodies of popular songs with biology-related lyrics, and "Biology Is Fun," a selection of essays, stories, plays and other works.

Scope and content

The Julian Corrington Papers contain teaching and academic files concerning the University of Miami in addition to materials on scientific research and literature. Class records and course materials, dated 1944-63, include syllabi, memos, lecture notes, book lists, lists of research topics, correspondence with students and student recommendations. Other correspondence and memos, relating to the Biology

Department discuss such topics as the curriculum, course requirements, faculty meetings and building plans. University of Miami "faculty notices," and "university memoranda" cover announcements of library news, information on education, and the Science Department. The records also contain publications such as "Self Portrait of a University," and a program from the 1962 dedication of the Otto G. Richter Library. Correspondence with faculty of other universities discusses the merits of general introductory science courses versus more specialized instruction.

Several files contain manuscripts and correspondence dealing with publications. Other files include materials on the electron microscope and include photographs taken through the microscope, reprints of articles and news clippings relating to the microscope. "Field Check Lists," dated 1917-21, and field trip reports record observations on the sea coast at Georgetown University. Photographs document trips led by Corrington. Reprints and publications on various scientific topics as well as and bulletins, newsletters, and programs from various scientific and scholarly organizations are included in files. Additional files of particular interest contain newspaper clippings and literature from various organizations on eugenics, genetics and the teaching of evolution. Corrington collected these materials, dated 1920-44, for inclusion in class lectures.
